

Harvey, IL (May, 2014) – Unistrut International is extremely proud to celebrate the 90th anniversary of Unistrut, the original metal framing system. A 90-year history is a testament to hard work and continuous improvement to meet our customer's needs.

Charles Attwood created Unistrut in 1924. The system offered a unique weldless connection that was infinitely adjustable and reusable. Over the past 90 years Unistrut has developed a robust line of channels, fittings, fasteners, hangers, pipe clamps and accessories in a variety of finishes and materials.

Unistrut continues to set the bar with new product innovations. Our newest product, Unistrut Defender (Patent Pending) brings a solution to the market that has never been available to framing and support applications in harsh environments. In addition, engineering capabilities including component testing, design calculations, FEA simulation are just some of the ways Unistrut ensures that our products remain at the highest quality and we remain a leader in innovation.

Unistrut's rich history, unmatched brand recognition and continuous innovation have made it a market leader in metal framing. Unistrut provides customers a complete product and service solution. Backed by our nationwide network of engineering and distribution partners, Unistrut is the number one choice for all your metal framing needs. For more information on Unistrut and our product offerings visit www.Unistrut.com.
